Web UI/Java Software Developer

ActiVia Networks, a STRATACACHE Company.

STRATACACHE is the industry leader in digital signage. We provide powerful end-to-end digital media deployments for the largest global businesses and brands across Quick Serve Restaurants, Retail, Consumer Package Goods, Retail Finance, Stadiums, Lottery, Gaming and Corporate Communications.

We develop Digital Signage systems (the TVs flourishing in stores and restaurants), Digital Menu Board systems (above cash registers in restaurants), Digital Experiences in stores (through SmartPhones, Tablets and TouchScreens) including Digital Play (games) and Video Walls. To support those systems, and to more broadly manage Digital Contents, Stratacache relies on a strong core management system, in charge of Content Management, Content Distribution, Device Management, Monitoring and Reporting, as well as specialized tools for Menu Board management.

We are rapidly growing and so is our R&D team.

Job Description

The main task is to design, develop, test and support the specialized core Web applications, using cutting edge Web technologies (Angular / Bootstrap 4). While the emphasis of the position is on the Web Interface and UI design, the task also requires backend ownership, based on SQL, Hibernate, SpringBoot, and more advanced tools, such as reporting engines and audio/video tools.

To accomplish the tasks, you will have a great autonomy, but you can count on the expertise of the current team who are well versed in the involved technologies.

Compensation and benefits are competitive. Work environment is stimulating and enjoyable, at downtown Montreal on McGill College in the Bell Media tower. Remote working is also possible (twice a week) after six months.

Responsibilities

- Design (collaboratively) and develop user interfaces
- Work in an Agile / Scrum team
- Help maintain code quality, organization, and automatization
- Ensure the best possible performance, quality, and responsiveness of the applications

Skills

- Proficient in Java, with a good knowledge of its ecosystems
- Proficient in Javascript, Angular, Bootstrap, CSS3, HTML5
- Strong experience in UI Design
- Familiarity with GWT, MVP is a plus (for legacy UI)
- Implementing automated testing platforms and unit tests (Protractor, Karma, JUnit)
- Understanding of code versioning tools, such as Git
- Familiarity with continuous integration (TeamCity)
